Subject: No Parking signs

Hi Bob,

A couple of updates:

1. For the No Parking on the east side of Milwaukee Street south of Seventh Street, the sign is no longer in place. Do you have a location at which you want the sign, or a distance from Seventh Street? I will need a distance for the Parking Committee proposed ordinance. We can measure it for you if you need once you determine the location.

2. We placed two portable No Parking signs on Seventh Street near Hart Park. Could you let us know if the locations are ok?

Thanks, Mark

Mark let's go with 150 ft south from the stop sign on Milwaukee at 7th.

As far as Hart Park I didn't see any signs up but the area should be 235 ft west of the stop sign at 7th and Appleton Rd. There is a light pole on the North side of the street on 7th where the No Parking area would end.

Sorry about the Hart Park - I thought they would be up by now, but they should be up sometime today. Thanks for the info.

I went and moved the sign at Hart Park, it was about 100 feet off. My guess is that those signs are going to get moved or stolen in that location.

We will be installing permanent sign posts at the correct locations as soon as Digger's Hotline start date allows us (probably next week). These are just temporary during the interim period.
