

Round Goby: Invasive Species in the Fox River

Presentation by Tim Campbell

Monday, February 8th at 6:30 pm

Shattuck Community Room

The Round Goby, an invasive species was discovered below the Menasha lock on the Fox River in September 2015. Tim Campbell, an Aquatic Invasive Species Specialist for the UW-Extension and Wisconsin Sea Grant will discuss the known impacts of this species and how we can help protect and manage the Lake Winnebago System.
