Chemical Water Treatments
Chemical Feed Equipment

PRODUCT: A-2000

PRODUCT APPLICATION:

A-2000 is a polymeric cationic microbiocide that is especially effective in controlling algae, bacterial and fungi in open recirculating cooling tower systems. A-2000 is effective over a wide pH range, will not cause foam and is convenient easy to use liquid.

FEEDING:

A-2000 is fed on a slug feed basis by adding it directly to the tower sump, through pot feeder or by diaphragm type chemical pump. This product can be fed directly from the container or as part of a convenient dilution when a chemical pump is used.

DOSAGE:

A-2000 dosage rate will depend upon the amount of water contained in the system and the amount of infestation. An initial slug dosage of 8 to 20 fluid ounces per 1000 gallons of water is recommended until control is evident. Subsequent maintenance dosage of 2 to 20 fluid ounces per 1000 gallons of system water should be added every two to five days as needed.

SPECIFICATIONS:

Appearance: Amber, Liquid

Specific Gravity: 1.01

pH (1% Solution) 6.06-6.5

Flash Point: None

Weight/Gallon 8.4

PACKAGING:

Available in 5 gallon plastic pail, 15, 30 or 55 gallon plastic drums. All containers are non-returnable.

HANDLING AND PROTECTION:

Use chemical resistant gloves and safety glasses or goggles are recommended.

Observe all safety precautions shown on the label and in the Material Safety Data Sheet.
