Re: No Parking on Garfield Street

I am writing in regards to the no parking signs placed on Garfield Street in the City of Menasha. From the intersection Washington Street and Garfield Street all the way back to the railroad tracks there is no parking on either side of the street. This is almost a two block area that has our plant to the north and a warehouse on the south side of the street with no parking available.

Vendors have been getting written warnings or tickets while servicing our business at our side entrance and ramp. They have come to me to voice their concern over this issue. They have no alternative but to park in the no parking areas to get their products in side entrance or ramp of our Menasha plant.

We would like you along with the board of public works and the city council to consider short term parking by our side entrance and ramp at Graphic Packaging. We feel this would maintain the no parking structure for the balance of the street yet give vendors a place for short term parking while doing business at the Menasha plant.

Please feel free to call me any time to discuss this matter. I will also make myself available for future discussion or meetings if need be. Thank you for your time and your consideration of this matter.
