

Laser Vision Correction

VIPA

block
VISION

Here's Looking at You

Offered by Vision Insurance Plan of America, Inc.

With recent advances in technology, more and more people are becoming prime candidates for laser vision correction, which offers many people a permanent improvement to their vision.

Members enrolled in VIPA's plan may elect to receive an allowance toward laser vision correction in lieu of the eyewear benefit.

Members who choose to receive laser vision services receive a \$200 allowance toward the total cost of such services.*

The laser vision benefit allowance may be applied to services received either in-network or out-of-network.

The advantages of using an in-network provider include the following:

● Lower Cost

- ✓ Lower out-of-pocket cost since the allowance is applied to the cost of your LASIK services; there is no need to file a claim for reimbursement

● Special Program Pricing

- ✓ All providers extend the following discounts to members: 15% off standard prices or 5% off promotional pricing
- ✓ Receive a free initial consultation with an in-network provider
- ✓ LasikPlus, with locations nationwide, offers members these additional program features:
 - Special "set prices" starting at \$695 per eye on select LASIK procedures
 - Advanced laser technologies including Wavefront and IntraLase (All-Laser LASIK)
 - Attractive financing options available

● Access to Providers

- ✓ The National LASIK Network is one of the largest networks in the U.S. and is comprised of more than 550 locations for superior access to providers

● Quality

- ✓ All surgeons are credentialed to the NCQA recommended standards ensuring the highest quality in patient care

Out of Network:

- Members who wish to use their LASIK benefit allowance for out-of-network services are asked to call us at (800) 883-5747 to make arrangements for claims submissions.

For Additional Information Call 1-888-734-8608 or visit our website at: www.vipalask.com

*Subject to routine regulatory filings and certain exclusions and limitations.

**Laser Vision Correction is one of the most popular
elective procedures on the market today.**
