CLINIC SERVICES

The Bluejay Health & Wellness Center

Nurse Practitioner Scope of Care

- Provide primary and preventive medical care
- Diagnose and treat illnesses
- Prescriptive authority
- Focus on health promotion and wellness
- Partner with you to manage chronic illnesses (non-insulin dependent diabetes, asthma, cholesterol, etc.)
- Order, perform and interpret diagnostic studies such as lab work and x-ray (x-rays not performed at clinic)

Health Promotion & Wellness

- Comprehensive Health Risk Assessment (HRA)
- Results shared with you via coach and/or nurse practitioner
- A plan for wellness coordinated, at your request, by the nurse practitioner

Patient Education

- Partnership with nurse practitioner
- Results of HRA could trigger need to provide additional education
- Health prevention and promotion
- Education before, during and after appointment with nurse practitioner

Disease/Case Management

- Identify high risk employees through HRA
- Develop plan based on individual results
- Ongoing monitoring

Services Not Performed by the Nurse Practitioner

- Specialty care - management of chronic pain, insulin therapy, eye and hearing exams
- Procedures - excision of moles or skin lesions, suturing
- Diagnostic testing - EKG, x-rays, mammograms
- Emergency care - acute chest/abdominal pain, anaphylactic reactions, difficulty breathing, etc.
