Water Safety Tips

From Wisconsin DNR

Take These Steps Before Getting Underway

- Tell someone where you are going and when you will return.
- Open all hatches and run the blower after you refuel and before getting underway. Sniff for fumes before starting the engine and if you smell fumes, do not start the engine.
- Check the boat landing for any local regulations that apply. If boating on the Great Lakes or Mississippi River, review the federal regulations for additional requirements.
- Make certain your registration is up to date and on board with you and that your boat displays the current year sticker

*"Tell someone where you
are going and when you
will return."*
