

Injury Care Services

Our injury care management team combines **optimal occupational health care** with **efficient case management** to help facilitate a **timely, safe and productive return to work**.

Injury Care

- Patients are treated by providers who specialize in occupational medicine.
- Quality care is provided with a thorough understanding of each patient's job requirements and return-to-work options.
- Practitioners are well-versed in state and federal guidelines.
- Same-day injury care is available.
- Occupational health assistance with injury triage assures the most appropriate level of care for each injury.
- Post-accident drug and alcohol testing services are available.

Case Coordination

- On-going injury care case tracking helps decrease expensive delays or setbacks.
- Feedback is encouraged with employers and employees about return-to-work expectations, concerns and restrictions.
- Patients receive help in coordinating timely and appropriate follow-up care.
- Employers receive educational services covering Workers' Compensation statutes, restricted duty programs, special accommodations, and need for professional evaluations.
