I want to make certain that all of us have the opportunity to live healthier lives. Joining in the vision of WELL Menasha! – To create a corporate culture that places the health status of its staff members among its priorities – gives us, as an organization, the framework to build a program that benefits us all. I believe that by working and learning together we can better the overall health of our employees. It is my hope that our involvement in WELL Menasha!, ThedaCare At Work, Affinity EAP, and WEA Trust health insurance benefits will help us work towards that vision.

One of our first opportunities is the ability to participate in personal health assessment screening. Active participation in the personal health assessment program will give you and your spouse personalized health information to help maintain or improve your overall health. The screening is conducted confidentially by ThedaCare At Work at no cost to employees as part of our health insurance plan. It will be conducted on site for your convenience.

The cost of health insurance is on the rise and our participation in this program is one way to soften the impact of higher health insurance premiums.

Being healthy plays a huge role in our quality of life and enjoyment of our jobs. I'm happy to see that our wellness committee and employees find value in initiatives like WELL Menasha! that aid in making Menasha a better place to live and work.

Thank you for all you do!
