

Annual Spring Clean-up

The spring collection runs from
Tuesday, April 13, 2010 to Tuesday, April 27, 1020

Yard waste will be collected curbside on the working day following your regular refuse collection day. If schedules are delayed due to unforeseen difficulties, service will be extended one week to compensate for lost time.

Please observe the following guidelines for the spring yard waste program:

- Yard waste must be separated from refuse and placed in containers such as garbage cans, plastic bags, or state approved biodegradable bags.
- The proper container needs to be placed on the terrace, not in the street.
- Corrugated boxes are **not** acceptable containers.
- Containers shall not exceed 36 gallons or 50 pounds when filled.
- Leaves not collected last fall should be placed in a container for collection or brought to the Public Works Facility during operating hours.
- Brush should be placed loose on the terrace and will be collected during brush collection.

If you have questions concerning spring collection, please contact the
Public Works Facility at 967-3620.

THANK YOU!
