

ENGINEERING TECHNICIAN

Menasha Utilities is accepting applications for the position of Engineering Technician. Menasha Utilities is a Wisconsin municipal utility serving over 9,100 electric customers in a community of 17,437.

The Engineering Technician shall be responsible for assisting the Technical Service Engineer, GIS Specialist, Distribution Technician, Metering Department and Engineering Manager.

This is a management position responsible for assisting in the design, implementation, and maintenance of technical projects of the water, electric and telecommunications utility. General responsibilities include, but are not limited to engineering, electric and water metering, special projects as assigned by the Engineering Manager, organizing maintenance activities involved in the substations and electric distribution, supervising contractor activities, GIS/CAD mapping, construction standards.

Other responsibilities under the direction of the Engineering Manager include assisting with the development of the department budgets; strategic planning; capital replacement plan; and providing other support services as required. It also includes participation in Commission meetings, keeping current in areas of responsibility by attending workshops, seminars, reviewing professional journals and reports, keeping up-to-date on new trends, methods, and technology in related areas.

For a complete job description and qualifications contact Candi Huber, Human Resources Coordinator for Menasha Utilities at 920-967-3604 or by email: chuber@ci.menasha.wi.us.
